DETAILED ACTION

1. The reply filed 9 September 2005 has been received and entered. Claims 1, 3, 4, 6-10, 12, 13, 15-19, 21, 22, and 24-27 are pending.

Information Disclosure Statement

2. Applicant has submitted a Korean-language document for consideration by the Examiner.

Each information disclosure statement must include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information listed that is not in the English language. The concise explanation may be either separate from the specification or incorporated therein with the page(s) and lines of the specification where it is incorporated being noted in the IDS.

It is noted that Applicant has submitted an English-language document (WO 92/15942), the front page of which has also been attached to the Korean-language document. It is further noted that the Figures present in the Korean-language document appear to correspond to Figures 1-3 of the English-language document. The Examiner assumes from this information that the English-language document is an equivalent to the Korean-language document.

“The duty of candor does not require that the Applicant translate every foreign reference, but only that the Applicant refrain from submitting partial translations and concise explanations that it knows will misdirect the Examiner’s attention from the reference’s relevant teaching.” See *Semiconductor Energy Laboratory Co. v. Samsung Electronics Co.*, 204 F.3d 1368, 54 USPQ2d 1001 (Fed. Cir. 2000).

Art Unit: 2192

The information contained in the Korean-language document has been considered ONLY to the extent that such information is also contained in the English-language document (WO 92/15942). The WO 92/15942 is assumed to reflect the most relevant teachings contained within the Korean-language document, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information listed.

Response to Amendment

3. Applicant's amendments to the specification appropriately address the objection to the specification based on improper usage of trademarks. Accordingly, this objection is withdrawn in view of Applicant's amendments.

4. Applicant's amendments to claim 19 appropriately address the rejection of claims 19 and 21-27 under 35 U.S.C. §101, based on non-statutory subject matter. Accordingly, this rejection is withdrawn in view of Applicant's amendments.

Allowable Subject Matter

5. Claims 1, 3, 4, 6-10, 12, 13, 15-19, 21, 22, and 24-27 are allowed.

6. The following is an examiner's statement of reasons for allowance: Applicant's amendments to the claims are consistent (although not identical) to the amendment proposed by the Examiner on 6 July 2005. The prior art of record fails to expressly teach or fairly suggest making a selection from a set of native operating system commands (for retrieving a variable

Art Unit: 2192

maintained by the operating system) for different types of operating systems, and the application being executable on each of the different operating systems, in combination with the remaining limitations of independent claims 1, 10, and 19. Claims 3, 4, 6-9, 12, 13, 15-18, 21, 22, and 24-27 are considered allowable at least by virtue of their dependence on allowable claims 1, 10, and 19.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
